

Mastering Meeting Minutes

MIA.Azaam

Junior Data Analyst - AppZ Makers

What exactly are Meeting Minutes?

- It is NOT a word-by-word script of the meeting.
- It is the official "Summary" or highlight reel.
- Focuses mainly on key discussions, decisions, and tasks.

Why do we need them?

- **The Time Saver:**
Helps people who missed the meeting catch up quickly.
- **Accountability:**
Keeps a record of who promised to do what.
- **Avoids Confusion:**
Prevents the "I thought you were doing that!" problem.

The Simple Formula (WWWD)

Who: List of attendees (and absentees).

What: The main topics discussed.

When: Date and Time of the meeting.

**Decisions & Action Items:
The most important part!
(What was decided and who is responsible).**

Work Smart with AI.

- Tools to use: Google Gemini, ChatGPT, Otter.ai.
- How it works:
You don't need to type perfect sentences during the meeting.
- The Hack:
Take messy, rough notes.
Paste them into AI and prompt:
"Turn these rough notes into a professional meeting summary with action items."

See the Difference!

The Bad Way (Too much story):

"We talked for 10 minutes about the website button.
Sarah wants it blue. John wants red.
Finally, we decided on blue.
Sarah will do it."

The Good Way (Clear & Professional):

1. Decision:
Website button color changed to blue.
2. Action Item:
@Sarah to update button color by Friday EOD.
