

Missing changes: BUSINESS DASHBOARD

- 1st Change: Need to add more categories
- 8th Change: Please cross check whether we can integrate

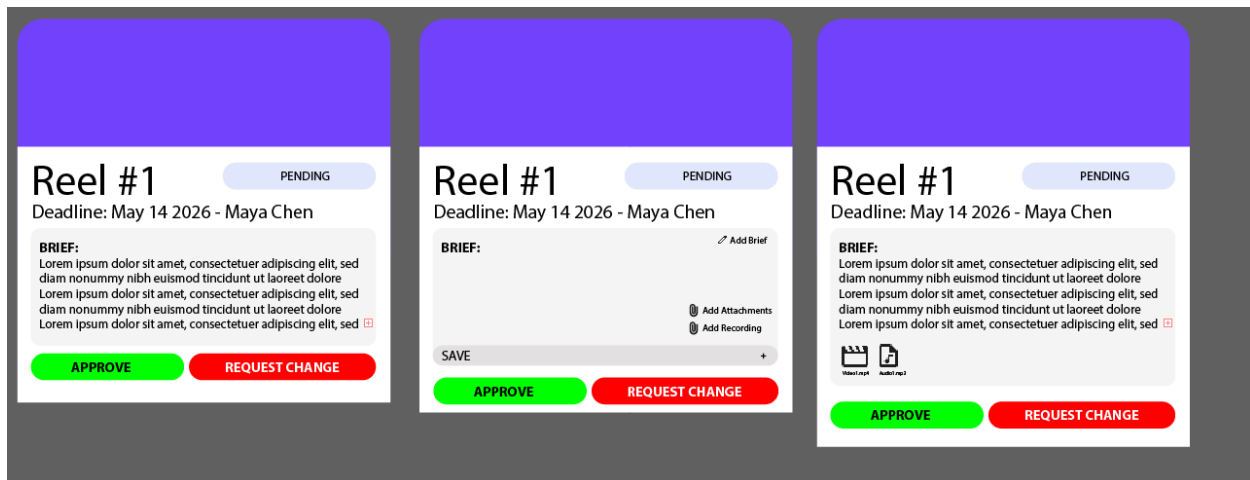

Campaign Workflow

The screenshot shows a web browser window with the URL `connect-spark-871.vercel.app/dashboard/campaigns?create=true`. The browser's taskbar at the top shows several open applications: Real Time Unicode..., Modyfi, POINT ONE, and RingCentral Support... The main content area displays a 'Create Campaign' modal form. The form has a title bar with a close button. Below the title is a progress indicator with four steps: 1. Campaign Details (highlighted), 2. Budget & Timeline, 3. Select Influencers, and 4. Review & Submit. The 'Campaign Details' section contains a 'Category' dropdown menu with 'Fashion' selected, a 'Language of Delivery' dropdown menu with 'English' selected, and a 'Target Platforms' section with a 'Select platforms...' button. Below this is a 'Deliverables' section with a text input field containing the placeholder text 'e.g. 1 x YouTube video (5 min)...' and a blue '+' button. At the bottom right of the form is a blue 'Continue' button with a right arrow.

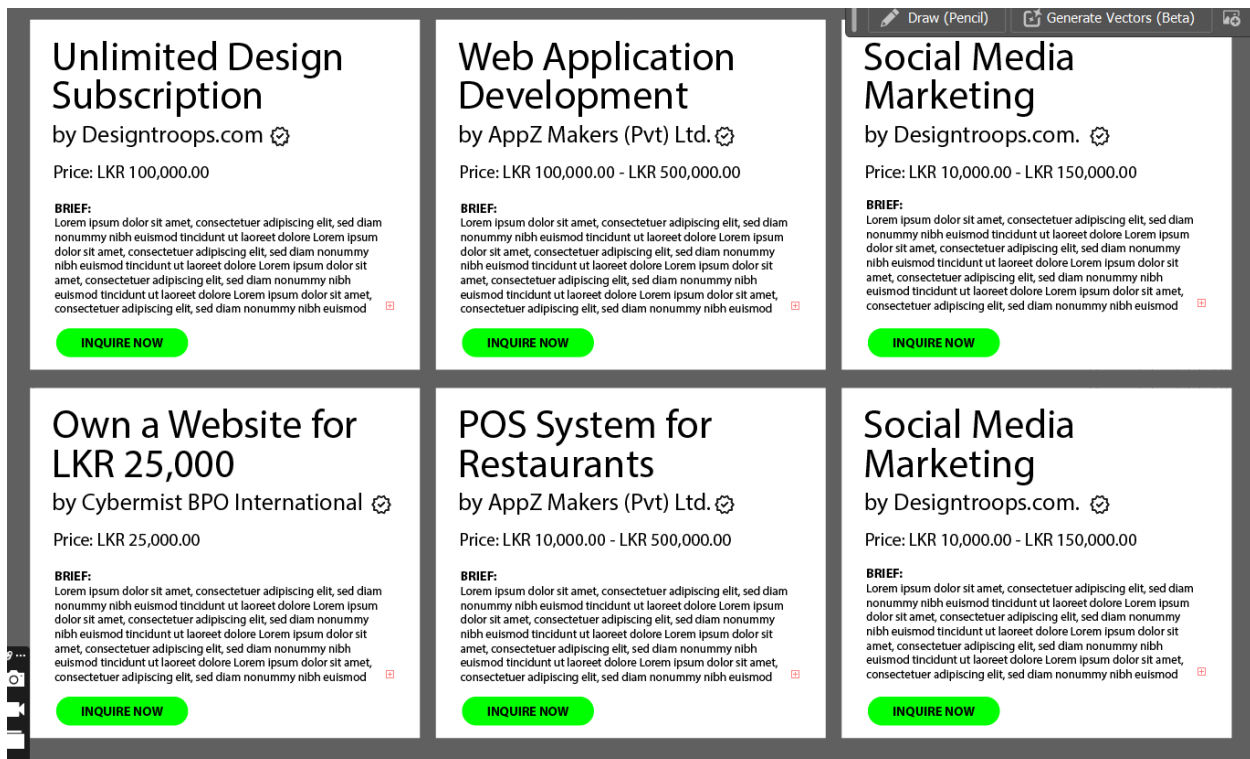

- 9th Change: Target platform should be icons (if there is a specific reason for keeping it as drop down, please let me know)
- NEW CHANGE A: I think it is better to give a drop down option to select from. (I think this way the platform can easily match the campaign budget with the influencer's rate card.) (also is it ok to ask the user to give detailed brief at the very first step? can we make it editable in the campaign workspace so the process would be simple for business. also please try to add a feature like uploading a screenshare / video/voice note or something so the influencer will get a more detailed picture. sometimes our users may have language barriers too)

CAMPAIGN WORKSPACE

Changes not being done it seems (please check the loom video I've sent)

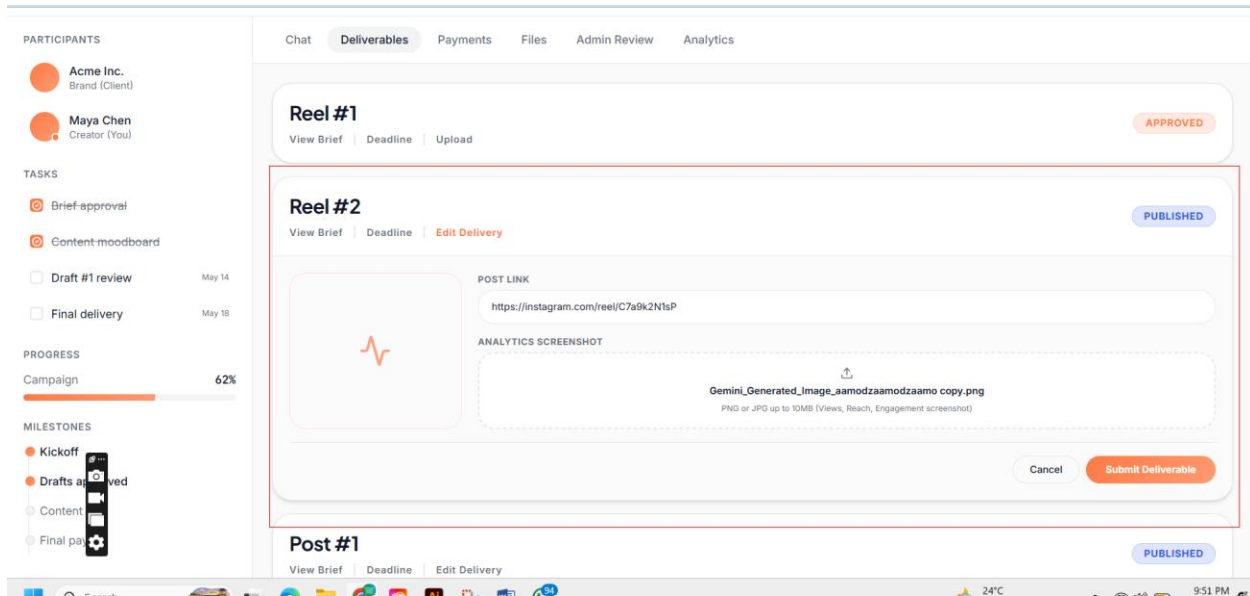

- New Change B / 18th Change: Deliverables area can be like this or we can arrange it in a list view instead of grid view
- 17th Change not done
- NEW Change C: The businesses should have a request tab to receive influencers pitch requests)
- NEW Change D: Can we add another tab for Business Services as we discussed? when pressed to inquire now, a notification will come to super admin and soon the admin will contact / transfer to the relevant company

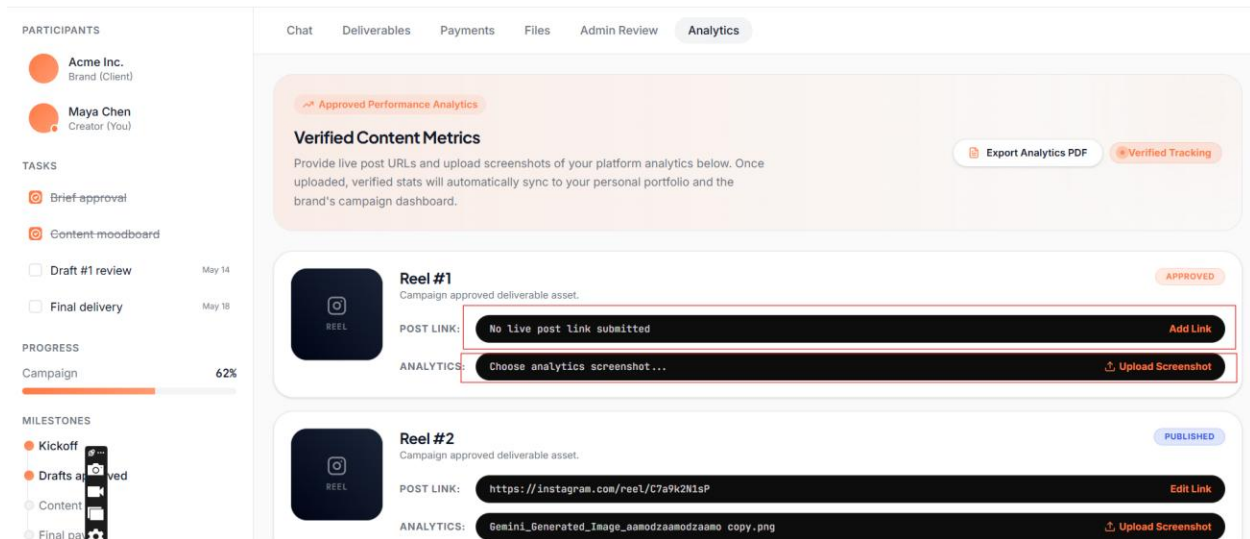

Missing Change 13A: create a tab for collab invites (similar to requests in influencer dashboard) to receive pitches sent by influencers

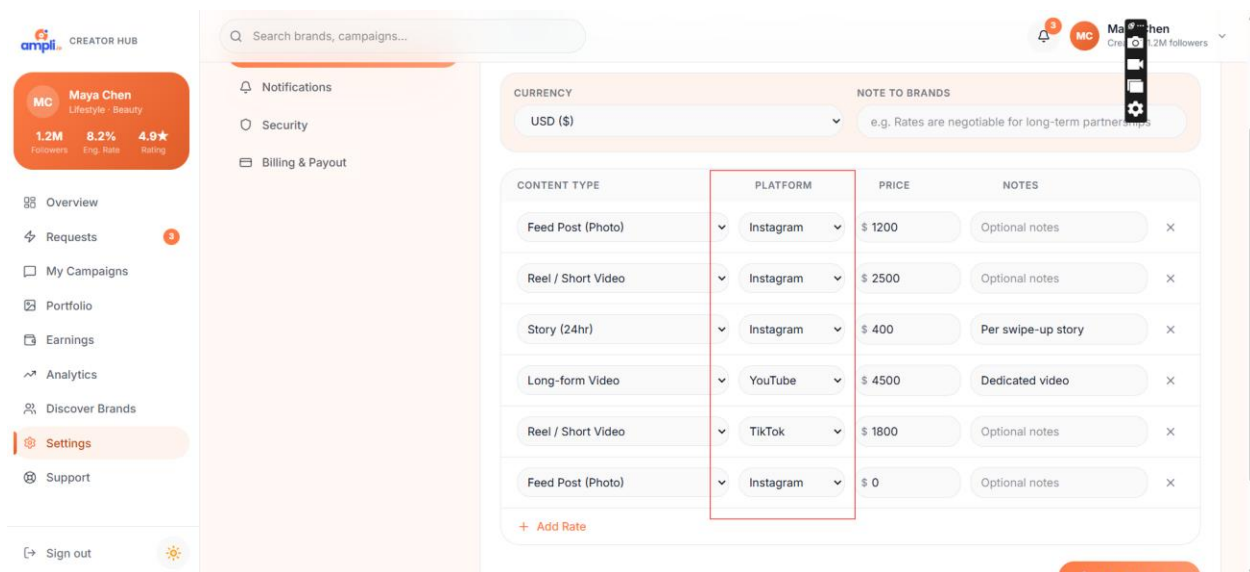

Missing changes: INFLUENCER DASHBOARD

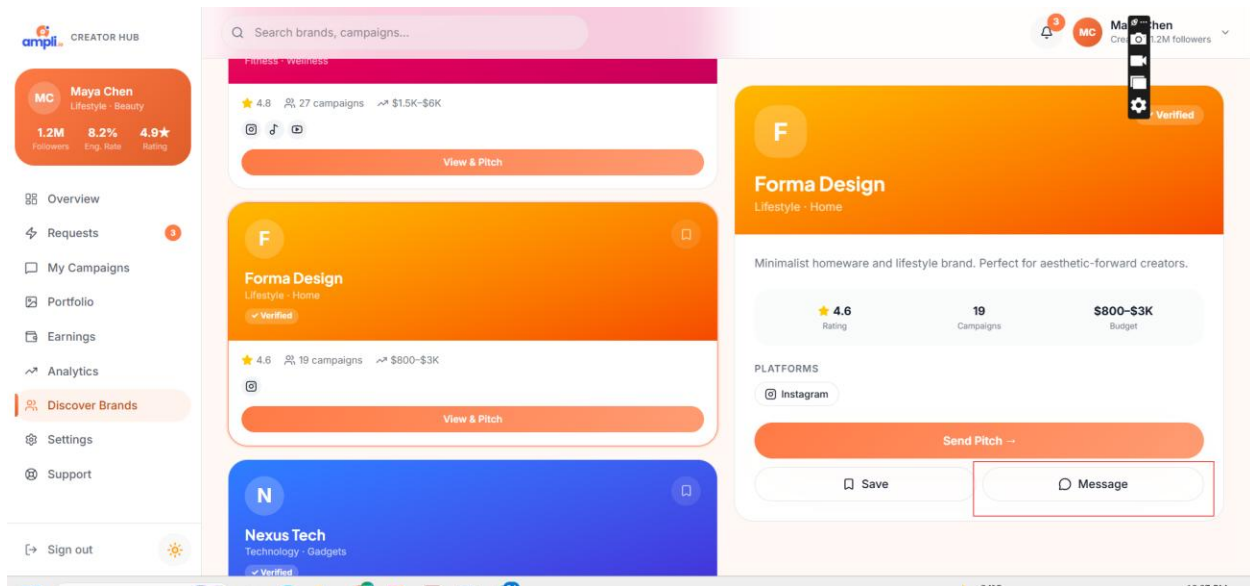

- New Change E: Post link and analytics screenshot should come to deliverables which got approved and published. Deliverables in pending, not started or revision requested need to have a field to upload the asset (video/image). since we have another tab called analytics within the campaign, we can remove analytics screenshot here and let the influencer upload the asset here (Drive link and / or Upload field. please note that the video files may be in big sizes (min 500mb) so please take that fact also into consideration.)

- New Change F: Black color in this UI is bit flashing. pls consider changing it to our platform color palette (light grey or even white)

- New Change G: here can we make use multiple choice icons for platforms. because many influencers will give kind of combo pricing. eg: Feed post on Instagram and Facebook for 15000/-, Reel in Youtube, Tiktok and Instagram for 20000/-

- New Change H: Let's remove direct message option for influencers to businesses while sending pitches
- New Change I: If it is possible, let's create another tab Business Services (same as in the business dashboard)
